

Dear Sisters and Brothers,

So, on the “Home Remodeling Shows” they often talk about adding a “**POP**” of color to dress things up in a room! So, on the “Home Remodeling Shows” they often talk creating an accent wall to add a “**POP**” of color so as to dress things up in a room which previously seemed somewhat bland!

Now, I love **SPRING**, that special season of the year when all that bland, or all that drab brown receives a “**POP**” of color as the buds on the trees pop open and the grass turns green. Ah, what a wonderful “**POP**” of color!!!

Now, I love **FALL**, that special season of the year when the trees and the leaves on the trees begin to provide us the opportunity to witness a “**POP**” of color which we might describe as a kaleidoscope of color!!! Indeed, so far this **FALL** there have been some wonderful changing colors!!! Ah, what a wonderful “**POP**” of color!!!

When pausing to consider spring, or when pausing to consider fall, it is possible to conclude that our gracious and loving **GOD** was aware of the value in a “**POP**” of color long before any “Home Remodeling Show” came along!!!

Indeed, **GOD** through the gift of nature has richly blessed us with many different kinds of “**POPS**” of color, from peacocks to tigers in the animal world, from the deep blue sea to the clear blue sky, from the wild flower to the precious butterfly, and also from sunrise to sunset!!! Ah, what a wonderful “**POP**” of color!!!

Perhaps there is yet another “**POP**” of color provided by our gracious and loving **GOD** which you may recall it is the “ROY G. BIV” “**POP**” of color, or the “Richard Of York Gave Battle In Vain.” “**POP**” of color which is red, orange, yellow, green, blue, indigo, and violet; ah yes that ever familiar “**RAINBOW**”!!! Ah, what a wonderful “**POP**” of color!!!

I have seen rainbows in waterfalls, rainbows which are faint and rainbows which are very brilliant, rainbows which are singles and rainbows which are double, rainbows which reach up into the sky and rainbows that touch the ground; ah, what a wonder “**POP**” of color provided in nature by our gracious and loving **GOD**!!!

Actually, the rainbow is something more than a little “**POP**” of color provided by our gracious and loving **GOD**, the rainbow is a reminder from **GOD** to us!!!

The rainbow is a sign of a covenant made by **GOD** with the whole world that there would never again be the like, of a devastating flood, such as occurred in the days of Noah. Indeed, the rainbow is a “**POP**” of color provided by **GOD** which highlights that **GOD** does **CARE**!!! Ah, what a wonderful “**POP**” of color!!!

Yes, there are many different “**POPS**” of color providing by our gracious and loving **GOD** which we can enjoy but real **JOY** is nurtured in our hearts when we are mindful of the reality that **GOD** truly does **CARE**!!!

Love in Christ,

Dana
